Layered Network Protection

Balancelogic SecurityAssuranceSM provides scalable and affordable IT Managed Security solutions that fit any small business and their budget. We offer flexible pricing packages which include monthly, quarterly, or annually options.

Gain Peace of Mind with Cost-Effective IT Managed Security Services

Network and computer security is no doubt one of the hottest topics being talked about right now. Although, it is one of the least important things small business owners think about on a daily basis. Network security and keeping your network protected is not just for big companies, it applies to small businesses as well, especially healthcare practices.

Our SecurityAssuranceSM Managed IT Security services monitors, manages, secures, and troubleshoots your entire network and protects your internal assets and data from unauthorized intruders, hackers, internal threats, and keeps your network in compliance with regulations such as HIPPA, HITECH, SOX, and PCI.
