HEINSOHN

salesforce

We build applications in a modern service platform with advanced Salesforce App Cloud tools. With the deployment of applications in Salesfoce, quiality attributes are acquired in a natural way that in a traditional scheme are highly expensive to developand maintain: Security, large scalePerformance and High Availability

What can be developed?

Highly productive transactional web applications.

Native mobile apps for different operating systems.

A marketplace to sell products.

Tailor-made modules.

Ideas admin module at no additional cost.

Mobile apps with collaborations tools at no additional cost.

Key Differences

- Building apps, reports, and dashboards is easy beacuse your data in integrated right in to Salesforce

- It is a utomatically deployed in mobiles, desktops and tablets. Connected with your data.

- Build fast, changes are easy. Its component-based architecture makes it easy to build an app with drag and drop tools.

- Security, high scale and performance, highly available

- Apps developed on Salesforcecome with inherent quiality attributes that otherwise would be highly expensive to developand maintain.

Is the **easiest way you can have an App**

You have an idea.

We build your app in a modern plattform with advanced tools of the Salesforce App Cloud.

You will end up with an app you can connect to, from your mobile or desktop.

Salesforce services developed **By Heinsohn**

Sales/Service Cloud
Keep track of your costumers and salespeople information on the cloud, sell master, faster, and the way you want in real-time. Monitor customer's needs and give them support by responding in whatever channel the customer feels comfortable using phone, email, sms and even Twitter or Facebook

Product Development
According to your market needs we develop your idea into an innovative product with lean methodologies and placed it in the appexchange, IoT, analytics,Artificial Intelligence, among others.

Salesforce Platform Development
Building an App is different in Salesforce, faster, trustier and securer. We build highly scalable web apps and back-end services by creating and integrating all their enterprise data, networks and identity information. Salesforce ir the shortest path from idea to App.

Lighting Ready Applications
Gives every company the tools they need to build next generation user interfaces. Build from scratch and migrate iser interfaces of existing Salesforce Apps. All new developments of both products and conventional developments are lighting.

Salesforce Non-Profit
We drive orientation and adoption using a project as a transformative way to understand a nonprofit company needs and priorities, and collaboratively shpe those into real solutions. It's build around people in order to have 360 degree view of the whole non-profit organization processes and sectors.

Third-party Integration
We have experience in integration in 3 different ways: Native Salesforce connector integration /Throughout filesThe systems as data basses ERP On- Premise, Business CORE Systems, DWH or other analytics solutions. Technologies used for integration are: SOAP/REST/SSL Protocols/SQL Databases, Amazon, SAP, Orecle, Azure, Cloud, Platforms, among others.

Benefits
